

Tapestry CRM

Unifying member data.
Powering smarter engagement.

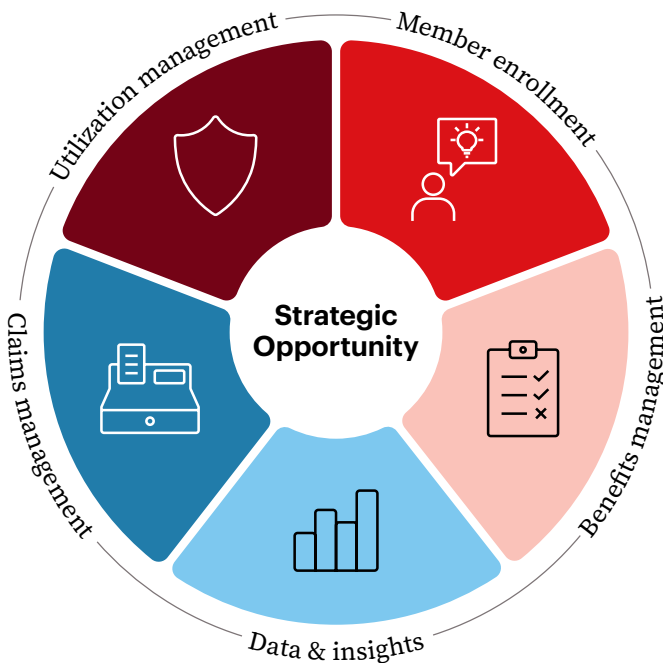

What is it used for?

Epic Tapestry is a managed care and claims module within Epic, designed for health plans and payers, that unifies member enrollment, benefits, claims, and utilization management in one system.

How we can help

Leverage Tapestry data to better inform and optimize marketing strategy and targeting for improved ROI.

Tapestry brings key member and claims data together so you can act with confidence.

Utilization management

Understand care patterns and manage utilization effectively

Member enrollment

Complete view of member demographics and eligibility

Benefits management

Access benefit details and coverage information

Data & insights

Power reporting, segmentation, and performance analysis

Claims management

Track, process, and analyze claims data
